The screenshot shows the Amazon Prime Video interface for the first episode of Season 6, titled 'Season 601'. The page features a large background image of Ragnar Lothbrok. Key details include a 4.5-star rating from 4,466 reviews, an IMDb score of 8.5, and a TV-14 rating. The synopsis describes Ragnar's adventures and his quest to become King of the Viking tribes. The cast list includes Kathryn Winsick, Gustaf Skarsgård, and Alexander Ludwig. At the bottom, there are options to watch the episode for \$2.99 or purchase the entire season for \$24.99. The page also includes a 'Watch Party' feature and a 'Share' button.

Hulu

Vikings season 6 episodes are available on Hulu. New subscribers are allowed to stream *Vikings* season 1 to 6 episodes for free. Up to now, all seasons and all episodes of *Vikings* are able to be watched on Hulu.

Netflix

Up to now, *Vikings* isn't available on Netflix, no matter which season and episode. However, the sequel episodes *Vikings: Valhalla* is in development for Netflix.

Outside US: How to Watch Vikings Season 6 Online in 2021

If you're a big fan of *Vikings* but you're staying at somewhere outside the US, then it'll be a tragedy since up to now Vikings are only available in the US. To enjoy your favorite TV series outside the US, [a VPN](#) is able to help.

A VPN can be used to block geographical restrictions and bypass censorship, so its users are allowed to have any access to all the content on the Internet no matter where you are.

To watch *Vikings* online at a place outside the US, first, connect with a VPN server in the US. Then, you'll be able to watch *Vikings* season 6 on the platforms introduced above.

Besides TV series, all the online content restrictions can be broken by a VPN including apps, websites, [online gaming](#), etc.

Apart from Geo-Restrictions Blocking, What Else Can a VPN Do in 2021?

Apart from being used to break geo-restrictions, a VPN can be also used to do more.

Hide Your IP Address

Your [IP addresses](#) expose too much personal information about you, including the place you're staying in, your home address, or even your name, your browsing history, what you're planning to buy recently or even what type of shoes or cars do you like.

As you get your device connected with a VPN server, your real geological location will be masked by the VPN server location. As a result, the VPN server location will be believed to be your real geological location.

Keep Full Anonymity

As your IP addresses are well-hidden due to the function achievement of a VPN, you'll be able to keep full anonymity on the Internet because your online activities won't be tracked or grasped. No hackers will know who you really are.

Protect Online Security and Privacy

A VPN provides an end-to-end encrypted tunnel where all your data go through. As such, all the communications between your device and the Internet are hidden under the tunnel and no one else will see. Then, your data and your personal information will be protected on the Internet.
